EDUCATION

Dwarkadas J. Sanghvi College of Engineering

B.Tech in Electronics & Telecommunication, Honors in AI/ML – CGPA: 8.45/10

Mumbai, India

Aug 2023 – May 2027

EXPERIENCE

Electronics & Software Trainee Engineer

Jun 2025 – Oct 2025

Prama Instruments Pvt. Ltd.

Mumbai, India

- Developed a real-time data acquisition platform integrating 7+ sensors, with automated data logging to a MySQL database and RESTful API endpoints for remote access
- Built a Python-based data processing and calibration pipeline, improving data reliability by 20% through statistical anomaly detection
- Collaborated in an Agile environment with weekly sprints, code reviews, and version control using Git

R&D Engineer & Technical Trainer

Jun 2024 – Jul 2024

RoboKart

Mumbai, India

- Delivered technology workshops across 5+ institutions to 300+ participants on IoT and automation, translating complex technical concepts into audience-appropriate, stakeholder-facing content

PROJECTS

Placement Trend Analyzer | *Python, Pandas, Scikit-learn, Streamlit*

Mar 2026

- Built an interactive analytics dashboard translating raw student and recruiter records into actionable placement trend insights, mirroring a lightweight BI reporting tool
- Applied data cleaning, aggregation, and predictive modeling to surface patterns across student and company data via a self-serve interface

ResQNet: Cloud-Integrated Crisis Management Platform | *Python, MQTT, REST API*

Mar 2026

- Architected an end-to-end IoT-to-cloud platform with real-time event detection and AI-assisted validation using a human-in-the-loop approach
- Implemented a decentralized mesh network with offline caching and automatic cloud sync, ensuring zero data loss during outages
- Built a web-based monitoring dashboard with real-time alerts, geolocation tracking, and automated incident reporting

Short-Horizon Return Prediction Engine (i-RAGE) | *Python, Pandas, Scikit-learn, SQL*

May 2026

- Built a scalable data pipeline processing 4+ GB of financial market data (2.4M+ records) with automated ingestion, cleaning, and feature engineering
- Engineered and benchmarked 5 ML strategies, improving prediction accuracy by 10–50× and identifying a 44× prediction-scaling deficiency via statistical analysis
- Developed automated diagnostic and validation tooling with unit tests, ensuring data integrity across 20+ iterative experiments

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, C/C++

Data & Automation: Pandas, NumPy, Scikit-learn, MQTT, REST APIs, ETL, Workflow & Pipeline Automation

Platforms & Tools: MySQL, Streamlit, Gradio, Git/GitHub, Agile/Scrum, Excel (Pivot Tables, VLOOKUP), Tableau

Cloud & Productivity: AWS (basics), Google Cloud Platform (basics), Linux (Ubuntu), Microsoft Office, JIRA

CERTIFICATIONS

Generative AI & LLMs (Intermediate) – Coursera (*in progress*)

Google Advanced Data Analytics – Coursera (*in progress*)

LEADERSHIP & CROSS-FUNCTIONAL EXPERIENCE

Internship & Placement Coordinator
Dwarkadas J. Sanghvi College of Engineering

Jun 2025 – Present
Mumbai, India

- Serve as primary liaison between recruiters, HR teams, and students, coordinating end-to-end campus placement and internship drives
- Manage recruiter communications, scheduling, and preparation pipelines, demonstrating cross-functional coordination and client relationship management

Treasurer – NOVA Committee
Dwarkadas J. Sanghvi College of Engineering

2025 – Present
Mumbai, India

- Manage committee finances including budgeting, sponsorship acquisition, expense tracking, and financial reporting across multiple college-wide events

Electronics Senior (Avionics)
DJS ARYA – Official Canister Satellite Team of DJ Sanghvi

Jun 2024 – Aug 2026
Mumbai, India

- Implemented Kalman & Complementary filter sensor fusion for high-frequency telemetry processing over XBee, field-tested up to 1 km range
- Designed and routed multi-layer PCBs (Altium Designer) and developed flight software on Teensy 4.1 & ESP32 for mission-critical avionics systems
- Built a custom ground station with real-time data visualization and antenna tracking, winning the Mark Walker Best Ground Station Award 2026

AWARDS

International CanSat Competition (AAS × NASA, 400+ global teams) – Ranked 1st in India for 3 consecutive years (2024–2026), peaking at 4th in Asia and 10th Worldwide

IN-SPACe CanSat India Student Competition (ASI × ISRO, 70+ teams) – All India Rank 1 for flawless subsystem integration and payload performance

Medal for Excellence in Internship – GUJCOST, awarded by Dr. Rajesh Modi for outstanding performance as a Robotics Trainer
