EDUCATION

Dwarkadas J. Sanghvi College of Engineering

Mumbai

B.Tech in Electronics and Telecommunication (Pursuing) | CGPA 8.45

B.Tech Honors in Artificial Intelligence and Machine Learning (Pursuing) | CGPA 8.2

EXPERIENCE

Electronics Trainee Engineer

June 2025 – October 2025

Prama Instruments Pvt. Ltd.

- Developed a real-time weather monitoring system integrating sensors for temperature, pressure, humidity, wind speed, rainfall, UV index, and ambient light.
- Built a custom 3D-printed wind-vane with Hall sensors for accurate wind-direction measurement, improving system calibration and data reliability through modular validation and testing.

Research & Development Engineer + Robotics Trainer

June 2024 – July 2024

RoboKart

- Conducted robotics training workshops across multiple colleges, teaching 300+ students on sensors, automation, Arduino/WiFi systems, and introductory IoT.
- Led practical sessions on motion detection, home automation, servo control, and security systems.

PROJECTS

Short-Horizon Return Prediction Challenge (i-RAGE)

May 2026

- Built a memory-optimized ML pipeline to predict short-horizon financial returns on $\tilde{4}$ GB of high-frequency market data (2.4M+ samples).
- Engineered and benchmarked 5 prediction strategies including gradient boosting ensembles, ridge regression, and rank-based transformations.
- Identified a $44\times$ prediction-scaling deficiency via statistical analysis, improving model output accuracy by $\tilde{10}$ – $50\times$.

Placement Trend Analyzer

March 2026

- Built an interactive analytics dashboard to identify placement trends and patterns across student and company data, translating raw records into actionable insights.
- Applied data cleaning, aggregation, and predictive modeling (Scikit-learn) via a Streamlit interface, mirroring a lightweight BI reporting tool.

Netflix Show Success Prediction

March 2026

- Built a classification model to predict Netflix show success (Hit/Flop) using metadata such as rating, type, duration, and release year, enabling data-backed content investment decisions.
- Compared Logistic Regression, XGBoost, and Random Forest after full data cleaning, encoding, and feature scaling; deployed the finalized model via a Gradio UI for real-time predictions.

SKILLS

Programming Languages & Frameworks: C, C++, Java, JavaScript, Python, Linux (Ubuntu), MySQL

Machine learning :Regression, Classification (Random Forest, XGBoost, Logistic Regression), Feature Engineering, Model Evaluation

Analytics & Data Tools: SQL, Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), Excel (Pivot Tables, VLOOKUP), Tableau, Streamlit, Gradio

Softwares: AutoCAD, KiCAD, Arduino IDE, Altium Designer, Edge Impulse, Fusion 360, XCTU (XBee Telemetry), MATLAB, Tableau, Excel

CERTIFICATIONS

Google Advanced Data Analytics: Coursera

Generative AI & LLMs (Intermediate): Coursera (In Progress)

ROS 2 for Beginners (ROS Jazzy - 2026) :Udemy (In Progress)

100 Days of Code: The Complete Python Pro Bootcamp :Udemy (In Progress)

POSITION OF RESPONSIBILITY

Internship & Placement Coordinator

June 2025 – Present

Dwarkadas J. Sanghvi College of Engineering

- Coordinating end-to-end campus placement and internship drives, serving as primary liaison between recruiters, HR teams, and students.
- Managing recruiter communications, scheduling, and preparation pipelines— demonstrating client relationship management and cross-functional coordination.

Electronics Senior (Avionics)

June 2024 – August 2026

DJS ARYA - The Official Canister Satellite Team of DJ Sanghvi

- Implemented Kalman & Complementary filter fusion for high-frequency telemetry processing over XBee, field-tested up to 1 km range.
- Designed and routed multi-layer PCBs (Altium Designer) and developed flight software on Teensy 4.1 & ESP32, integrating IMU/environmental sensors and closed-loop PID motor control for mission-critical avionics systems.

AWARDS & ACHIEVEMENTS

- Won the **Mark Walker Best Ground Station Award (2026)**, International CanSat Competition, for developing a custom ground station with real-time data visualization, antenna tracking, and telemetry management.
- **Ranked 1st in India for three consecutive years (2024–2026)** at the International CanSat Competition (AAS × NASA, 400+ global teams) — peaking at **4th in Asia and 10th worldwide** (2026).
- **All India Rank 1**, IN-SPACe CanSat India Student Competition (ASI × ISRO, 70+ teams), for flawless subsystem integration and payload performance.
